

Professional Summary

- 4.8+ years of experience in analyzing, designing, developing, debugging, and maintaining Pega applications, with hands-on experience across Pega versions 8.4, 8.6, 8.8, 24.2, and 25.1.
- Strong expertise in Pega application development, including Case Management, Data Modeling, Decisioning, Integrations, UI Development, Security, Background Processing, Reporting, and Quality Assurance.
- Proven experience in troubleshooting and resolving complex application issues.
- Hands-on experience in Pega integrations using REST/SOAP APIs and Kafka.
- Hands-on experience with Pega Integrations, Pega Customer Decision Hub (CDH), Pega Constellation, Pega Generative AI, Pega Traditional DX APIs, and Pega Application Upgrades.
- Experienced in using Pega Deployment Manager for application deployment and release management, and Pega Diagnostic Center (PDC) for application monitoring, performance analysis, and troubleshooting.
- Experienced in technical leadership and team mentoring, including leading key components, conducting code reviews, supporting junior developers, and collaborating with cross-functional teams.
- Adaptable and committed to continuous learning, with a strong interest in emerging technologies and modern software development practices.

Professional Experience

- | | |
|--|---------------------------|
| • NatWest Group | Chennai |
| Software Engineer, Associate Vice President | May 2026 - Present |
| Software Engineer, Associate | October 2024 - May 2026 |
| • Societe Generale Global Solution Centre | Bangalore |
| Software Engineer | July 2022 - October 2024 |
| Intern | March 2022 - July 2022 |
| • Virtusa Consulting Services Private Limited | Hyderabad |
| Intern | January 2022 - March 2022 |

Projects

- Project Name:** FranFinance Application

Organization: Societe Generale Global Solution Centre

Summary:

 - Production support for a financial services platform focused on capital goods financing for businesses and consumer credit solutions for individuals.

Key Responsibilities:

 - Analyzed and resolved business-raised issues, performing root-cause analysis, and implementing fixes to ensure smooth and reliable application functionality.
 - Utilized Pega Tracer and application logs to troubleshoot complex issues, identify root causes, and implement effective solutions.
 - Troubleshoot and fixed issues across core Pega components, including report definitions, sections, job schedulers, queue processors, data transforms, validations, activities, and data pages.
 - Leveraged Pega Diagnostic Center (PDC) to monitor application alerts, investigate underlying issues, and implement corrective actions to improve application stability and performance.
- Project Name:** Claims Supervision Application

Organization: Societe Generale Global Solution Centre

Summary:

 - Contributed to a low-code application using Pega App Studio to track and manage high-value claims across multiple countries, enabling centralized visibility and streamlined claims monitoring.

Key Responsibilities:

 - Analyzed business requirements and contributed to proposing and implementing effective Pega solutions aligned with functional requirements.
 - Configured and implemented key Pega components, including case life cycle, activities, flow actions, job schedulers, data transforms, sections, and report definitions.
 - Developed Pega UI components, including portals, dashboards, and widgets, to provide intuitive user interfaces and effective visualization of application data.
 - Designed and executed end-to-end scenario test cases for case types to validate functional correctness and ensure application quality.

Project Name: Outage Component

Organization: Societe Generale Global Solution Centre

Summary:

- Led the end-to-end development of a reusable Pega component to dynamically display application outage and maintenance notifications to users during planned maintenance or unexpected downtime.

Key Responsibilities:

- Analyzed business requirements and proposed effective solutions, translating functional requirements into scalable Pega implementations.
- Configured and implemented key Pega components, including data transforms, data pages, sections, decision tables, decision Trees, and when conditions.
- Implemented REST integrations to enable seamless communication between the reusable component and provider application.
- Collaborated with multiple application and cross-functional teams to understand integration requirements, support component adoption, and resolve implementation-related issues.

Project Name: CREWS Application

Organization: Societe Generale Global Solution Centre

Summary:

- Contributed to a integration-focused application managing workflows for creating and maintaining third-party legal entities through integrations with external systems.

Key Responsibilities:

- Analyzed business requirements, proposed effective solutions, and implemented functional requirements by developing and configuring Pega application components.
- Developed and configured key Pega components, including data transforms, activities, flows, flow actions, sections, data pages, report definitions, job schedulers, queue processors, and skins.
- Designed and implemented connect REST and service REST integrations to enable seamless data exchange with external systems and support end-to-end business workflows.
- Led the development of selected application components, coordinating implementation activities and ensuring timely delivery of quality solutions.
- Conducted code reviews to ensure adherence to Pega development standards, coding best practices, and application quality guidelines.
- Mentored junior developers, providing technical guidance, knowledge sharing, and support in resolving development and implementation challenges.
- Investigated and resolved business-reported defects, performing root-cause analysis and implementing fixes to ensure system reliability and smooth application functionality.

Project Name: Customer Decisioning Application

Organization: NatWest Group

Summary:

- Contributed to a Pega Customer Decision Hub (CDH) application to provide Next Best Actions (NBA) to users across different franchises and channels, leveraging customer details and previous interaction history to deliver relevant and personalized recommendations.

Key Responsibilities:

- Led the implementation of Single Sign-On (SSO) authentication across multiple environments by configuring authentication services and keystores, streamlining secure user access.
- Led the customization of operations manager application to enhance user experience and deliver personalized workflows based on business requirements.
- Led the design and implementation of Kafka-based integrations in Pega for event-driven communication, leveraging JSON and Avro message formats.
- Developed a new Pega constellation application leveraging Pega Generative AI capabilities, including GenAI connects, agents, and tools, and DX APIs to automate the creation and configuration of new actions.
- Developed and configured key Pega components, including data flows, strategies, datasets, service SOAP, connect REST, validations, data jobs, activities, data transforms, decision data, access groups, access roles, access roles to object, access control policies, queue processors, job schedulers, and file listeners.
- Supported Pega application upgrades, analyzing compatibility considerations, resolving upgrade-related issues, and validating application functionality to ensure a smooth transition to the target Pega version.
- Collaborated with cross-functional teams and stakeholders to understand requirements, coordinate integration activities, resolve technical challenges, and ensure successful end-to-end delivery.
- Mentored junior developers and supported team members by providing technical guidance and resolving code-related queries to improve team productivity and code quality.
- Built and configured deployment pipelines using Pega Deployment Manager to automate and streamline the deployment of application artifacts across multiple environments.

Skills Summary

- **BPM** : Pega
- **Language** : Java (Basics), Python
- **Database** : Oracle, Postgres

Certifications

- Certified Pega System Architect (8.4)
- Certified Pega Senior System Architect (8.6)
- Certified Pega Decisioning Consultant (8.8)
- Certified Pega Data Scientist (24.2)

Education

- | | |
|---|--------------------|
| • Bachelor of Engineering, Electronics and Communication Engineering | CGPA: 8.83/10 |
| Rajalakshmi Engineering College, Chennai, Tamil Nadu | June 2022 |
| • Higher Secondary School Certificate | Percentage: 90.41% |
| Valluvar Gurukulam Higher Secondary School, Chennai, Tamil Nadu | May 2018 |
| • Secondary School Leaving Certificate | Percentage: 93.80% |
| Zion Matriculation Higher Secondary School, Chennai, Tamil Nadu | May 2016 |

Awards and Honours

- Spot Award for Commitment from Societe Generale Global Solution Center, December 2022.
- The Heartfelt Hero Award from Societe Generale Global Solution Center, September 2023.
- Commitment Award from Societe Generale Global Solution Center, June 2024.
- We raise the Bar Behaviour Award from NatWest Group, October 2025.
- Nominated for the Early Career Award from NatWest Group, November 2025.
- We own our Impact Behaviour Award from NatWest Group, June 2026.
